# Why Suburban Tool?

With over 40 years experience in close tolerance manufacturing, Suburban Tool is able to solve many of your metalworking problems. Our 65,000 sq. ft. facility in Auburn Hills, Michigan houses skilled craftsmen producing quality fixtures, steel stamps, machine tool components, prototypes, short-run production, medium-run production and rapid prototypes.

At Suburban Tool, you can expect Quick Competitive Quotes, Fast Deliveries and Exceptional Quality from a company that always stands behind its work.

Until now, competitive outsourcing of metalworking processes required companies to purchase from small suppliers with limited capabilities. This is no longer true.

Suburban Tool manufactures a proprietary line of precision workholding and inspection tools sold through industrial distributors worldwide. This business base facilitates Suburban Tool's ability to provide contract machining at job shop prices while delivering world-class quality and service. The end result is hard cost savings to you, our customer.
